

3B's Our Solar System Poems

UNIVERSE ACROSTIC POEM by Jemima

Universe full of shimmering stars
Never you see a spot without a star
I wish we could pass our own galaxy
Very dark, can't see very much
Every astronomer is busy finding out about space
Russians got the first man into space
See all the stars from your room
Every star is glowing all the time

SATURN by Tomas

Saturn, Saturn oh so far
How I wonder what you are
Riding on the massive stars
How I wonder where you are..

UNIVERSE ACROSTIC POEM By Kate

Unidentified flying objects everywhere
Never ending blackness
Including all the stars and planets
Venus is the second from the huge Sun
Earth is the only planet with life
Rocky planets, gas giants are all planets
See Pluto is left out because it's really a dwarf planet
Earth is going to have the Sun shining on it for ages.

URANUS HAIKU by Elliot

Uranus is green
It has twenty seven moons
I like Uranus

ASTEROIDS ACROSTIC POEM By Tara

A shooting star is good luck
Space is too big
To see a planet go up close
Earth is our planet
Russians decided to go to space
Our solar system is a big place
Investigating planets is interesting
Do get involved
Space!!

SPACE ACROSTIC POEM by Hannah

Stars sparkling in space
Pluto goes in its own pace
Around the Moon big & small
Craters come crashing more
Everything is so far away

JUPITER HAIKU by Daniel

Jupiter is bright
Jupiter has a dark spot
It can be a night star..
